Aashish Kumar

Adm. No. 24JE0758 +91-98359-29984
24je0758@iitism.ac.in aashish1r reck98 Portfolio

Education

Indian Institute of Technology (ISM) Dhanbad Expected May 2028

Bachelor of Technology in Electronics and Communication Engineering (CGPA: 9.31 / 10.00) *Dhanbad, Jharkhand*

- **Relevant Coursework:** OOPs using JAVA (NCSE202), Introduction to Algorithms (NCSE102), Computer Programming (NCSV101)

Projects

GenWeb.ai – AI-Powered Website Builder | *React 19, Node.js, Express.js, MongoDB, Firebase, Stripe, OpenRouter*

Live: gen-web-ai-1-6qrz.onrender.com | **GitHub:** github.com/reck98/gen-web-ai

- Architected a full-stack AI SaaS platform using React, Express.js, MongoDB, and OpenRouter that transforms natural-language prompts into production-ready, responsive multi-page websites through an LLM-driven code generation pipeline.
- Engineered an end-to-end website generation workflow featuring conversational AI refinement, Monaco-based live code editing, real-time preview, and one-click deployment, enabling users to iteratively build and customize websites in 4–5 minutes.
- Built secure Firebase OAuth + JWT authentication, integrated a Stripe-powered credit-based billing system (100/500/1000 credits), and developed scalable REST APIs for project management, deployment, and persistent website storage.

ResearchMind – Multi-Agent AI Research Assistant | *Python, LangChain, Groq API, Tavily, Streamlit*

Live: research-mind-reck98.streamlit.app | **GitHub:** github.com/reck98/research-mind

- Architected a multi-agent AI research system using LangChain and LCEL, orchestrating Search, Reader, Writer, and Critic agents to automatically generate structured research reports from web sources.
- Engineered an end-to-end research pipeline integrating Tavily Search, BeautifulSoup-based web scraping, and Groq LLMs, with exponential backoff for API rate limits and automated report export in Markdown format.
- Developed an interactive Streamlit dashboard with real-time pipeline progress tracking, enabling users to research any topic through a four-stage AI workflow from information retrieval to report evaluation and quality scoring.

git-smart – AI-Powered Git Workflow Assistant (npm Package) | *Node.js, TypeScript, OpenAI, Gemini, Anthropic*

npm: npmjs.com/package/@reck98/git-smart | **GitHub:** github.com/reck98/git-smart

- Developed and published an AI-powered Git CLI on npm that automates Git workflows by generating production-quality commit messages, summarizing code changes, and supporting Conventional Commits using multiple LLM providers.
- Engineered an interactive workflow with repository validation, smart staging, .gitignore generation, remote configuration, first-commit detection, and configurable Git operations, streamlining the complete commit-to-push process.
- Designed a multi-provider AI architecture supporting OpenRouter, OpenAI, Anthropic, and Gemini, with global/local configuration management, secure API key handling, environment variable overrides, and dry-run support for flexible developer workflows.

Technical Skills

Languages: C++, Python, TypeScript, JavaScript, SQL

Frameworks & Technologies: React.js, Node.js, Express.js, LangChain, LangGraph, CrewAI, LCEL, OpenRouter, Tailwind CSS, Redux Toolkit, Vite, Firebase Authentication, JWT, Stripe, REST APIs

Databases: MongoDB, Mongoose, PostgreSQL

Developer Tools: Git, GitHub, Docker, Linux, Postman, npm, uv

Achievements

- **Codeforces:** Expert (Current: 1669, Max: 1677) | reck98
- **CodeChef:** 3 Star (Current: 1712, Max: 1757) | reck_98
- **LeetCode:** Knight (Rating: 1852) | reck98
- Peak global rank of **58** in **CodeChef Starters 238** and rank **858** in **Codeforces Round 1099 (Div. 2)**.
- Solved **700+** algorithmic problems across Codeforces, CodeChef, and LeetCode, demonstrating strong proficiency in Data Structures & Algorithms.

Social Engagements

- Club Member, **FinTech Club**, IIT (ISM) Dhanbad
- Organizer, **Alumni & Corporate Relations Team**, PLUTUS'25
- Sports: Badminton, Chess (Max Elo: 898)
